

Reception Summer Term Newsletter

Welcome back.
 We can't believe it is the Summer term already and that the children are in their last term with us!
 This is always a busy term with lots of fun events.
 The aim of this newsletter is to keep you informed about what is happening in Reception this term. However please do ask if there is anything else that we can help you with.

Topics

Our topics for the this term are lots of fun! They are:

- Space
- Dinosaurs
- Farms & Food
- Minibeasts
- Kenya

If you have any books or resources that we might find useful please do bring them in, but make sure they are named.

Library

Our library upgrade is complete and offers great access from home including access to ebooks & the opportunity to write & read book reviews.

Login information has already been sent out to you but if you have any problems accessing the Reading Cloud do let us know and we will be able to help.

Individual Observation Sheets

We will continue to send home these fortnightly until half term. Please be sure to read them and do try to write a comment on the observation or on any events at home.

Literacy

The support that you give your child with reading is invaluable. Please ensure that you write in their reading diary every time you read with them. They need to use the four main cues when they are reading i.e. picture, phonic knowledge, the context & also recognising some words by sight. Remember that asking your child to point to the words as they read really helps.

We have now taught the formation of all letters. We will spend the next few weeks recapping these and ensuring that they are applying them every time they write. We will continue to teach phonics in our letters & sounds sessions and sending home their phonics books into which we will add any new sounds as we cover them.

Gardening!

We are very keen to get the children growing things this term.

In order to be able to harvest & taste the crops before we break up we need to start with small plants rather than seeds. If you are able to buy cucumber, pepper or carrot 'plug' plants for us to grow please send them in. We would be most grateful.

Trip to Nower Wood

We are off to Nower Wood on Friday 23rd June.

A letter detailing the cost of the trip and asking for offers of help on the day will be coming home soon. Look out for it in your child's book bag.

Maths

In Numeracy we are continuing to work on number formation as well as recognising and writing larger, 2 digit numbers.

We will be widening the children's mathematical language through practical problems, activities & games as well as continuing to work on doubling as well halving.

Maths Challenge Cards

Each week your child will bring home a card with a practical number problem on it. The idea is for you to do the activity with your child at some point across the week. The emphasis is on practical maths so there is no need to record what they have done unless they would like to. Please return the card each Friday so that they can all receive a new one.

Now the summer term is here we no longer offer milk. We would therefore ask that the children have a named water bottle in school each day.

The weather can be unpredictable at this time of year, so we ask that unless the weather is glorious, you send your child to school with a coat each day. When the weather is warm it is advisable for them to wear sun cream. We are unable to re-apply cream at school so we suggest that you use the long lasting type. Please also send your child with a named sun hat. They are also available to buy from the school shop.
